

Solutions to seamlessly replace Google Cloud Print.

After December 2020 Google will no longer offer their Google Cloud Print service. Therefore, customers who currently use this service will need to integrate a new solution for their cloud printing needs to maintain business processes without disruption.

Complete Solutions for your Business

Kyocera recommends the following alternatives. This software was designed to help streamline processes to boost both productivity and security. For a more comprehensive solution, Google Connector and MyQ can be used together:

Google Connector

Users can quickly retrieve their information when and where it is needed. Kyocera brings this essential capability to the MFP to drastically boost productivity.

	<p>Mobility: Provides users with the ability to print from their Google Drive account at the device operation panel.</p>		<p>Control: Browse and/or create their destination folder at the panel of the device and input a file name.</p>
	<p>Efficiency: Includes the ability to scan and store documents directly into Google Drive from the panel of the device as well.</p>		<p>Streamlined: Quickly compose and send emails with scanned file attachments through Gmail, directly from the MFP.</p>

MyQ

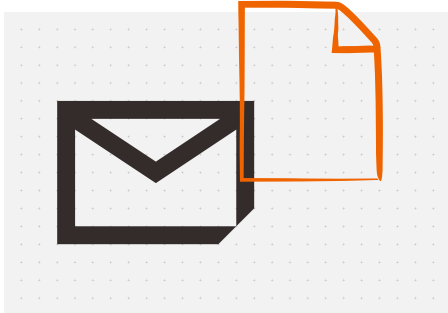

MyQ is a wide-ranging output, capture, and fleet management solution that enhances devices, making them intelligent, central ports of any office.

	<p>Convenience: Email to Print and Web to Print capabilities with enhanced file format support.</p>		<p>Flexibility: Print and Follow feature allows users to walk up to any device and release their jobs.</p>
	<p>Versatility: Supports PDF, BMP, JPEG, PNG, TIFF & TXT, and MS Office file formats (Word, Excel, PowerPoint).</p>		<p>Support: Additional app for iOS and Android devices expands support onto these devices for direct printing.</p>

Complimentary Device Features:

Kyocera offers a range of complimentary alternatives for customers which fit seamlessly with existing Kyocera printing devices. These represent an easy-to-use and cost-effective way to digitalize your workflows and drive efficiency.

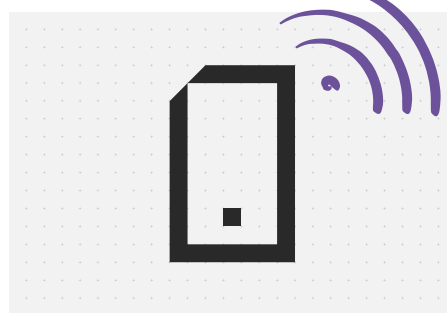

Email to Print

An easy way to print the documents you want, when you need them, via email.

- + **Standard:** A complimentary firmware feature of all Kyocera MFPs and Printers.
- + **Ease of use:** Simple configuration by inputting email information into the Command Center of MFP.
- + **Secure:** Devices can verify an email address then download and print the attachment(s) and, optionally, the body of the email as a cover page.
- + **Requirements:** Compatible files include PDF, TIFF, JPEG, PNG, or TXT.

Kyocera Mobile Print

Use your mobile device to connect wirelessly to compatible Kyocera printing devices.

- + **Compatibility:** Supports iOS and Android devices as well as Chromebooks.
- + **Functionality:** Designed to utilize mobile devices Wi-Fi connection to discover devices.
- + **Requirements:** Compatible files include PDF, TIFF, JPEG, PNG, and TXT.
- + **Convenience:** Seamless integration with Dropbox, Evernote, and OneDrive for both printing of documents as well as scanning and storage of documents.

IPP/IPPS (Internet Printing Protocol/ Internet Printing Protocol Secured)

IPP is a protocol that controls send/receive print data via internet or print devices.

- + **Standard:** A complimentary firmware feature of all Kyocera MFPs and Printers.
- + **Verified:** Recommended method by Google for devices running ChromeOS.
- + **Functionality:** On Windows and Mac devices, this solution utilizes the respective Kyocera KX Driver to present users with a familiar interface.
- + **Secure:** IPPS ensures jobs are encrypted while in transit.

Google Cloud Print may have become a staple for your operations, but these solutions provide a quick-fire way to keep your workflows optimized.
